Important Update
For Visitors

For the safety of our staff, patients and the general community, Mid North Coast Health is taking steps to reduce the risk of COVID-19 spreading by changing our guidelines on visits to hospitals and inpatient facilities.

Please stay away from the hospital if you don’t need to be there.

You can keep in contact by phone where possible or visit on alternate days.

If you do need to visit please understand we are limiting this to just one visitor per patient each day.

All staff and visitors to this health facility will be screened before entry. You will be asked COVID-19 related questions and your temperature will be taken.

We ask for your help in keeping our hospitals, staff and patients safe.
